

Mohamed Khaled

Software Engineer

Cairo, Egypt | +20 1012488360 | mo.khaledmr@gmail.com | LinkedIn | GitHub

SUMMARY

Motivated Software Engineer specializing in .NET development with strong experience in building scalable web applications using ASP.NET Core, MVC, Web APIs, and SQL Server. Skilled in designing full-stack systems with clean architecture, performance optimization, and maintainable code. Dedicated problem solver with 700+ solved algorithmic problems across multiple competitive programming platforms. Solid foundation in Data Structures, Algorithms, and Object-Oriented Programming (OOP). Experienced in delivering real-world projects, secure authentication systems, and database-driven applications.

EDUCATION

Benha University – Shubra Faculty of Engineering

Oct 2022 – Present

Bachelor of Engineering (B.E.), Computer Software Engineering

EXPERIENCE

Digital Egypt Pioneers Initiative (DEPI) – .NET Developer Intern

Jun 2025 – Dec 2025

New Cairo, Egypt (Hybrid)

- Engineered scalable full-stack applications using C#, ASP.NET Core, and SQL Server
- Built 15+ RESTful API endpoints and backend systems following clean architecture principles
- Applied Entity Framework Core, LINQ, and advanced database optimization techniques
- Integrated secure authentication and role-based authorization using ASP.NET Identity
- Delivered a full-stack capstone project simulating a real-world software development lifecycle
- Improved soft skills including communication, teamwork, and time management through Agile collaboration

PROJECTS

AutoHaven – Car Rental/Selling System | GitHub

ASP.NET MVC, C#, EF Core, SQL Server, Bootstrap

- Built a comprehensive full-stack vehicle marketplace system with advanced search and listing features
- Architected and constructed the application using ASP.NET MVC following clean architecture principles and separation of concerns
- Integrated a simulated RESTful payment API to test and validate transaction workflows within the system
- Optimized database operations and handled relational data using LINQ, significantly improving performance and query efficiency in SQL Server
- Established authentication and role-based authorization using ASP.NET Identity to secure user access
- Crafted a responsive user interface using Bootstrap to enhance usability and overall user experience

- Enabled Multi-Account Management, allowing users to create and manage multiple accounts for personal or business finances with separate cash flow tracking
- Executed Dynamic Deal Tracking using JavaScript to add, edit, and display financial transactions in real-time with detailed descriptions and categorized entries
- Formulated a robust SQL Database-Backed History to securely store all transactions, ensuring data integrity
- Enabled advanced search and analysis features, allowing users to view and analyze their full financial history anytime

Freelance Landing Pages

HTML, CSS, JavaScript, Bootstrap

- Created and successfully delivered 5+ high-converting, fully responsive landing pages for various clients as a freelance developer
- Built mobile-first interfaces ensuring a seamless user experience across all devices and screen sizes
- Enforced technical SEO best practices to optimize web structure and improve visibility on search engines
- Optimized website speed and code quality to achieve 90+ Lighthouse scores in Performance, Accessibility, and Best Practices metrics

TECHNICAL SKILLS

Languages: C#, JavaScript, SQL**Backend:** ASP.NET Core (MVC, Web API), RESTful APIs, Clean Architecture**Databases:** SQL Server, Entity Framework Core, LINQ, Database Optimization**Security:** ASP.NET Identity, Cookie-Based Authentication, Role-Based Authorization**Frontend:** HTML5, CSS3, JavaScript, Bootstrap**CS Fundamentals:** OOP, Data Structures & Algorithms, Problem Solving**Tools:** Git, GitHub, Visual Studio, VS Code**ACHIEVEMENTS**

Solved 700+ algorithmic problems across multiple competitive programming platforms

Strong foundation in Data Structures and Algorithms

Participated in ECPE Qualifications (Egyptian Collegiate Programming Eliminations)

CERTIFICATIONS

MCIT Summer Training – Web Development and Data Analysis

McKinsey Forward Program – Problem Solving and Adaptability

ALX AI Career Essentials (AICE)

AWS Cloud Foundations

ECPE Qualifications Participation Certificate
